RE: Commendation – Frank Miraglia

Dear Baha:

This letter is to serve as a commendation for Mr. Frank Miraglia.

As you know, Frank recently conducted training classes for the M2 and M2V controllers here at our facility. Frank not only conveyed the information required (and then some), but he did so in such a way as to make the entire learning process not only exceptionally educational but also very entertaining.

Our company president, Stan Peregoy, monitored the training sessions several times and his comment regarding Frank's abilities was, "If our people can't learn the subject matter from Frank, they won't learn it from anyone"!

Not only did Frank do an outstanding job with the seminar, he has also been extremely helpful to me and our field personnel in the installation and programming of the controllers (he's always there for us).

It is rarely one encounters an associate with the attitude, skills and abilities of Frank Miraglia.

He is indeed an asset to your organization.

Sincerely,

A handwritten signature in blue ink that reads "Thomas B. Murphy". The signature is fluid and cursive, with a long horizontal line extending from the end.

Thomas B. Murphy
